Monmouth University

BA in Communications, Minor in IT

2012 - 2016

Track and Cross Country team

PROFILE

Front-end engineer with 8+ years and 25+ client sites built in Vue.js, Laravel, and WordPress for healthcare, education, e-commerce, and enterprise clients, including a B2B e-commerce network that grew online sales 80%. I turn client requirements into fast, accessible, scalable products, and pair hands-on engineering with an AI-assisted workflow that shortens delivery cycles without sacrificing quality.

EXPERIENCE

UI Developer

2022 - Present

MCG Strategic · Marlton, NJ (Remote)

- Built 15+ client platforms across healthcare, education, and enterprise, architecting custom web applications in Vue.js, Laravel, WordPress, and Node.js.
- Engineered an AI-assisted workflow: review agents that critique work before release, reusable playbooks encoding team standards, MCP integrations, and automated Playwright checks.
- Improve site performance, SEO rankings, and accessibility compliance across client engagements.
- Create reusable UI components and front-end systems shared across client builds.

Senior Front-End Developer

2020 - 2022

Snap Pak · Hackensack, NJ

- Drove an 80% overall increase in online sales by building and managing a network of B2B e-commerce websites for a packaging retailer.
- Partnered with marketing to design high-converting sites that turned traffic into B2B orders.
- Ran targeted digital ad campaigns to attract new B2B buyers.

Senior Front-End Developer

2018 - 2020

Two Words Digital Agency · Fort Lee, NJ

- Joined as a junior developer and was promoted to senior, going on to manage client relationships and mentor junior developers.
- Led end-to-end design and build of high-performance, high-traffic websites.
- Delivered showcase presentation sites demonstrating high-scale architecture that helped close major client deals.
